FOIA EXEMPT - INTERNAL EPA CORRESPONDANCE

Jan - I think you wanted this? Was not entirely clear how we left this Friday.

In a letter to Mathy Stanislaus dated September 12th the Shoshone Bannock Tribes expressed their frustration with the Region not offering consultation on the use of slag. The Superfund program approved the phase 1 work on September 5th and provided a response to the Tribes comments and the Tribes August 22nd request for consultation. AWT has prepared an approval letter for modifications to the RCRA slag pit sump which requires backfilling as part of the phase 1 Superfund work.
